

Your Car Shades are fitted using our patented clip system which consists of a selection of different clip types. Details of the quantity, type and positioning of the clips will be found within the installation instructions received with your Car Shades. However, as many of our clips are similar in shape and size, here is our handy size guide to help you identify which clip is which.

### CLIPS THAT ATTACH TO THE FRAME OF YOUR CAR SHADE

### CLIPS THAT ATTACH TO THE FRAME OF YOUR VEHICLE WINDOW

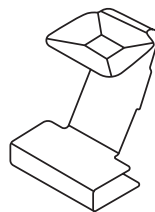

CL-M05

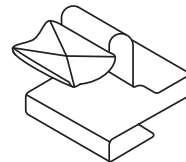

CL-M09

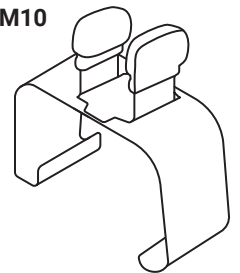

CL-M11

CL-M15

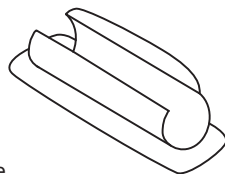

CL-M10

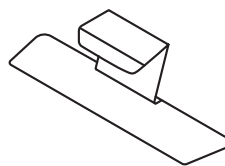

### CLIPS THAT STICK TO THE DOOR FRAME OR GLASS OF YOUR VEHICLE

If you have one of these clips you'll also be supplied with a surface cleaning wipe. Please ensure you use this cloth to clean the area where the clips will be applied and it is allowed to dry before the clips are applied.

### FITTING TOOL

Some installation kits are supplied with a fitting tool that will help you peel back the rubber seal of your window to allow clips CL-M05, CL-M09, CL-M11, and CL-M15 to attach to your door frame.

**Please note not all kits are supplied with this tool as some vehicles have rubber seals that are easy to access and therefore do not require the tool.**
